

Java

```
class Solution {  
    public int swimInWater(int[][] grid) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[][]} grid  
 * @return {number}  
 */  
var swimInWater = function(grid) {  
  
};
```

C++

```
class Solution {  
public:  
    int swimInWater(vector<vector<int>>& grid) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int SwimInWater(int[][] grid) {  
    }  
}
```
